

## Logic Model Template

What are the attitudes/behaviors you are attempting to change?

- 1.
- 2.
- 3.

What can you measure to attest to these changes?

- 1.
- 2.
- 3.

What programs/activities do you do to accomplish these changes?

- 1.
- 2.
- 3.

What resources do you need in order to make this program/activity happen?

- 1.
- 2.
- 3.

Starting with the end goal mentioned above, fill in this chart from right to left building your organizational/program logic model from end to start.

| Objectives: What is the simply stated achievable "goal" | Resources: What is needed to move from objective to activity (financial, IT, human, capital, expertise, etc) | Activities: Quantifiable activity/project description components                                 | Outputs: Countable or measurable results from the activities that lead to the outcomes | Outcomes: Long range change in attitude or behavior      |
|---------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|----------------------------------------------------------|
| <i>Ex: to decrease poverty in the community by 50%</i>  | <i>Ex: qualified teacher, marketing and promotion, class space, online streaming technology</i>              | <i>Ex: one-hour weekly budgeting classes are taught online or in person at the local library</i> | <i>Ex: average income is raised to above state poverty indicator</i>                   | <i>Ex: Poverty is eliminated in the community of ABC</i> |
|                                                         |                                                                                                              |                                                                                                  |                                                                                        |                                                          |
